INFINITE GREEN®
Medicine By Nature

Feed Supplements For Farm Animals

Infinite Green Ltd, is a manufacturer of feed supplements for farm animals. It is located in the Galilee, Eilaboun, North of Israel.

Since its beginning in 2013, Infinite Green has followed the vision of its Owner to pioneer a natural way to maintain the health of animals using herbs and spices.

Infinite Green started its own experimental coop five years ago, investigated the Performance of broilers supplemented with different natural spices and herbal extracts. We seek out for herbs and spices according to their special approach for animal total health system, they believe that the three major systems of the body, digestive system, endocrinal system, and immune system are strongly connected and refer to it as "the triangle of health".

Product: Chicken Forte

Chicken Forte is:

- An aqueous mixture of natural herbs and spices extracts for poultry.
- Ingredients: spices extract, herbs extract, ethanol, and vinegar.
- Main herbs in Chicken Forte:

Mentha spicata leaves

Matricaria recutita flowers

Pimpinella anisum

Origanum syriacum leaves

- Suitable for organic broiler production industry
- Natural growth promoter
- Medications: No more medications or additives are needed
- Side effects: Not recorded, Interactions: Not recorded.
- Delivered in drinking water.
- Dosage: 400ml in 1000L drinking water.

The herbal extracts contain various phytogenic substances such as Tannins Saponins, Glycosides, Polyphenols, Sterols, and Alkaloids that enhances nutrient absorption, supports overall animal health especially gut status, and boosts the immune system, thus leading to:

- ✓ Higher Quality meat (Due to antioxidants)
- ✓ reduction in the incidence of muscle abnormalities (white striping and wooden)
- ✓ Increasing growth rate in broilers
- ✓ reduced mortality
- ✓ improved Feed conversion ratio – FCR (Due to clean & healthy gut)
- ✓ Decreased chance of diseases infection
- ✓ increase in net weight of meat compared to live chicken.
- ✓ increase in Relative Economic Efficiency (REE):
  - 9-10% due to reduced production costs due to improved FCR.
  - 3.5-6.5% due to Improved yield in net weight.
  - 1.7-3.5% due to Decreased mortality.
  - 2-3% due to reduction in: energy total usage, medication use, labor days, etc.

*All results are based on:

1) Scientific research Paperwork Published by: Pro. Jamal Abo Omar at Al-najah National University, "Performance of broilers supplemented with natural herb extract".
2) Trials done in commercial chicken house located in north Israel.
